October 2021

### Architect

Boogertman & Partners Pretoria

### General Contractor

Ikotwe Construction Nelspruit

### Project Location

Mbombela, Mpumalanga, South Africa

# PROJECT OVERVIEW

---

## Eva-Last completes luxury hotel façade and recreation pool area

The Capital Hotels and Apartments group has described its new Mbombela feature hotel as a significant social hub for business meetings, domestic leisure tourism, the local community and international visitors. Designed with high-end socialising in mind, the hotel features an ultra-modern design aesthetic which stands out, yet compliments, in its bushveld locale.

A celebration of open design and flow, the luxury hotel's main road-facing façade was intended by the architects to showcase a softer aesthetic, when compared with more typically sharp, 'brutal' exterior material treatments. Eva-Last supplied 200m<sup>2</sup> of VistaClad wall cladding, as well as 36m<sup>2</sup> of gate cladding to give the building a natural timber appearance throughout the building, linking exquisitely to the interior wooden finishes and creating a natural flow throughout.

The repeated feature cladding on the parkade entrance has created an impeccable synergy in appearance. While the versatility of the Eva-Last fascia cladding enabled the use of a variety of angles within the gate construction to create a unique yet seamless 'wood look'.

The pool pergola provides continued aesthetic flow into the main hotel recreation area. The Pergola not only provides a beautiful aesthetic but its fade, weather and decay resistant nature will be sure to offer hotel visitors respite from the baking lowveld sun for years to come.

# KEY INFLUENCER QUOTE

---

"The Capital Hotels and Apartments Group is very happy with the look and installation."  
- Greg Reid, Boogertman & Partners Pretoria

## ABOUT US

---

Eva-Last is a globally reputable brand that utilises a solution driven business model to create innovative, sustainable building materials and systems that add value to customers' lives. At the heart of Eva-Last is a team of highly capable, creative specialists united by a passion to promote environmental consciousness through eco-friendly building products and operations. By embracing low environmental impact manufacturing and cutting-edge composite technology, Eva-Last is revolutionising how building can be done. We design and deliver beautiful, long-lasting green alternatives that make our customers' lives easier, healthier, and just plain better.
