Addition of cladding to existing facades

### Date of Installation

December 2022

### Architect

Grand Foods Pty Ltd

### General Contractor

Deckon Projects

### Project Location

Centurion, Gauteng, South Africa

### Product Used

±400 m<sup>2</sup> VistaClad Tiger Cove

## PROJECT OVERVIEW

---

### Burger King gets a whopping new look

Fast food megabrand Burger King gave its Jean Crossing franchise outlet in Centurion a whopping new look with an update from its former, corrugated exterior. In the fast-paced, ever-competitive fast-food category, the site urgently needed a flaming hot new "dressing" that would tantalize tastebuds and entice customers to come into the restaurant and not only drive-through for the standard fast-food fare. In addition, the remodel needed to conform to the international chain's trendy new organic identity within a budget.

## PROJECT MATERIAL SELECTION

---

### Great taste rules.

Just as great taste is subject to changing food trends and flavours, so is décor. Current décor trends tend towards a warm and welcoming, calm, natural earthy aesthetic that invites patrons to linger longer and enjoy their meal. This is a major departure from garish fast-food colours complimented by traditional bricks and mortar or the steel and chrome super-slick aesthetic of before. Today it's about encouraging patrons to hang-out rather than grab- 'n-go.

Burger King's exterior remodel aims to embrace this trend within the practical limitations of individual sites - transforming the dining experience for patrons in each new store, whilst containing the costs of future conversions of over 100 existing franchises nationwide. Burger King also needed to retain certain key elements such as the large glass facades whilst transforming the outer shells in a uniform, cost-effective manner.

Since revamps or retrofits of fast-food franchises can't take months to complete with an army of contractors, Deckon Projects had just two weeks for this remodel to take place from start to completion.

## THE KING GETS A NEW COAT

---

In-house architect Jean-Pierre de Jager of Grand Foods elected to clad the exterior walls with Eva-Lasts' versatile VistaClad, Infinity cladding in his design.

VistaClad's interlocking board profiles easily attach to existing exterior surfaces using hidden joists with clip strips and fasteners. The dark and dramatic wood-look shade and embossed textures of VistaClad's Tiger Cove instantly transformed this building's exterior shell, adding an earthy, natural wood look that is designed to last for years to come.

Available in a variety of colours, VistaClad's durable, low-maintenance boards provide a UV and weather-resistant, colourfast 'skin' that retains its natural good-looks without fading and carries a 25-year warranty. What's more, the highly engineered cladding system provides both ventilation and insulation to the structure, while being resistant to water or degradation from pests or environmental damage and won't be subject to unnecessary replacement or maintenance - essential for fast-food outlets.

## KEY INFLUENCER QUOTE

---

“By using VistaClad’s Infinity cladding and complementary accessories to affix the sub-frame joists onto the existing exterior surface, we were able to give Burger King Jean Crossing a contemporary feel without major renovations and restructuring” says Duane Davis of Deckon Projects.

## SUMMARY

---

Burger King Jean Crossing got a whopping new makeover without the need for a whopping big budget. The exterior surface was cladded with VistaClad Infinity in Tiger Cove for a quick and convenient update in warm, wooden tones in line with contemporary décor trends. The durable, hardwearing exterior provides an attractive, easy-to-maintain shell that tempts patrons to visit, whilst meeting the stringent specifications of high-traffic fast-food environments.

## ABOUT US

Eva-Last is a globally reputable brand that utilises a solution driven business model to create innovative, sustainable building materials and systems that add value to customers' lives. At the heart of Eva-Last is a team of highly capable, creative specialists united by a passion to promote environmental consciousness through eco-friendly building products and operations. By embracing low environmental impact manufacturing and cutting-edge composite technology, Eva-Last is revolutionising how building can be done. We design and deliver beautiful, long-lasting green alternatives that make our customers' lives easier, healthier, and just plain better.
